Example 1 – system with sending devices

sending device → measurement packet → device
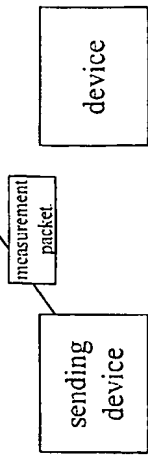

Example 2 – system with receiving devices

device → measurement packet → receiving device
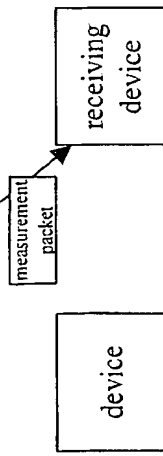

Example 3 – system with sending devices and receiving devices

sending device → measurement packet → measurement packet → receiving device
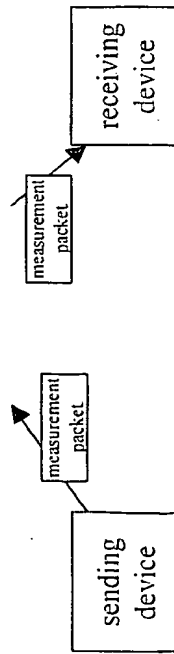

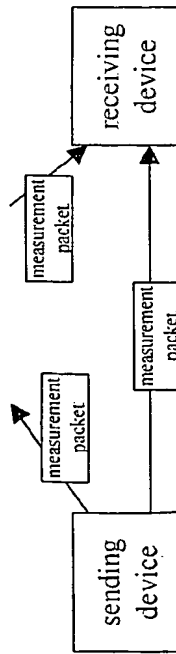

Example 4 – system with sending devices sending packets to receiving devices

sending device → measurement packet → measurement packet → receiving device

Example 5 – system with sending/receiving devices

sending/receiving device → measurement packet → measurement packet
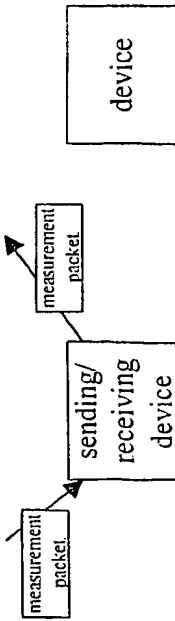

Example 6 – system with sending/receiving devices and receiving devices

sending/receiving device → measurement packet → measurement packet → receiving device
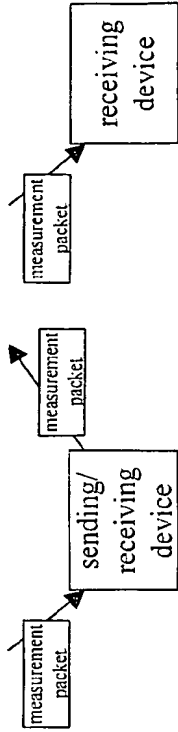

Example 7 – system with sending/receiving devices sending packets to receiving devices

sending/receiving device → measurement packet → measurement packet → receiving device
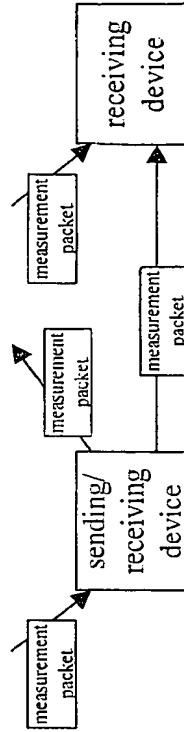

Example 8 – system with sending/receiving devices receiving packets from sending devices

sending/device → measurement packet → measurement packet → sending/receiving device → measurement packet
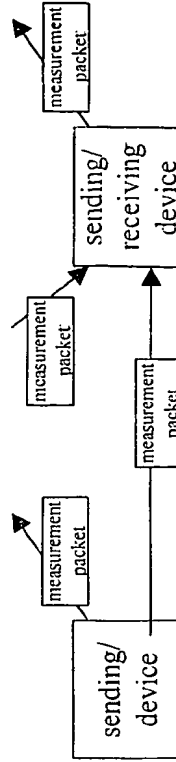

Example 9 – system with sending/receiving devices sending packets to sending/receiving devices

sending/receiving device → measurement packet → measurement packet → sending/receiving device → measurement packet
